Words to Know

What the words mean - and how a garden keeps you well.

BASIL - A fragrant herb for cooking. Rub a leaf and breathe in its sweet, fresh smell.

BEES - Busy garden helpers that carry pollen from flower to flower. Give them room, and they will not bother you.

BLOOM - A flower opening in color. Watching things bloom is a quiet joy.

DAISY - A cheerful flower with white petals around a sunny yellow middle.

FLOWER - The colorful part of a plant. Flowers feed the eyes and the bees.

GARDEN - A place where plants are grown with care. Tending one is gentle exercise in fresh air.

ROSE - A beloved flower with a sweet smell. Mind the thorns when you pick one.

SEEDS - The tiny start of every plant. Planting a seed is planting hope.

SUNNY - Bright with sunshine. A sunny morning is good for plants and people alike.

TOMATO - A red garden favorite, delicious warm off the vine in summer.

TULIP - A cup-shaped spring flower that comes in many bright colors.

WATER - What every garden drinks. Plants and people both grow with enough.

Three gentle habits from the garden

1. A little every day. Short visits keep plants happy, and your body from getting sore.

2. Rest, and drink water. Sit in the shade, sip some water, and enjoy what you have grown.

3. Share what grows. A tomato or a flower given to a neighbor is good for the heart.
